

HEALTHCARE PROFESSIONAL EVALUATION QUESTIONNAIRE

Enhancing Medical Education with Virtual Reality:
A Digital Twin for ECG Training

Participant code (optional): _____	Date: ____ / ____ / ____
------------------------------------	--------------------------

Purpose of the questionnaire

This questionnaire evaluates the usability, clinical plausibility, educational value, and potential professional applications of a virtual reality environment for ECG training. Your responses will support the assessment and refinement of the system.

Participation is voluntary. Responses are anonymous and confidential and will be used exclusively for research purposes.

Instructions

For each statement, select the response that best reflects your level of agreement. Please choose one option per statement.

1	2	3	4	5
Strongly disagree	Disagree	Neutral	Agree	Strongly agree

Evaluation items

No.	Statement	1	2	3	4	5
1	The ECG simulation accurately reflects clinically plausible patterns.	☐	☐	☐	☐	☐
2	The application supports effective formative assessment for learning in cardiology.	☐	☐	☐	☐	☐
3	The visual and dynamic representation of the ECG is appropriate for educational purposes.	☐	☐	☐	☐	☐
4	The design supports a workflow that is coherent with clinical practice.	☐	☐	☐	☐	☐
5	The VR application could be successfully integrated into medical training programmes.	☐	☐	☐	☐	☐
6	The level of customisation of physiological parameters is sufficient to create different training scenarios.	☐	☐	☐	☐	☐
7	The outputs generated by the application are consistent with those expected in realistic clinical cases.	☐	☐	☐	☐	☐
8	The application could be useful for research or specialised training.	☐	☐	☐	☐	☐
9	The overall usability of the system is satisfactory.	☐	☐	☐	☐	☐
10	I would recommend its use in professional or advanced educational settings.	☐	☐	☐	☐	☐

Open feedback

What aspects of the application would you improve or change?

Thank you for your valuable contribution.
